Tolstov, Yu. P.

IMPAIRMENT OF HEARING AND VESTIBULAR
FUNCTION IN BRUCELLOSIS. [1962] [8]p. 30 refs.
Order from OTS or SLA \$1.10 62-23572

Trans. of Vestnik Oto-Rino-Laring[ologii] (USSR)
1959, v. 21 [Nov/Dec] p. 24-29.

DESCRIPTORS: *Hearing, Ear, *Brucellosis, In-
flammation, Nervous system.

The auditory analyzer is involved in 29% of brucellosis cases. Involvement of the external and middle ear was found in 3% of our cases. Inflammation of the middle ear, developing against a background of brucellosis, provides a semblance of intracranial complications, which may lead to errors in diagnosis. The most serious pathology is the involvement of the cochlear portion of the inner ear, seen by us in 25% of our cases. Disturbance of vestibular function was found in 8% of our cases, manifested primarily in a slight depression of function. (Author)

SOME EXPERIMENTAL DATA ON THE INFLUENCE
OF STREPTOMYCIN ON THE VESTIBULAR ANA-
LYZER. [1962] [9]p. 23 refs.
Order from OTS or SLA \$1.10 62-23381

Trans. of Vestnik Oto-Rino-Laring[ologii] (USSR)
1960, v. 22 [May/June] p. 27-33.

DESCRIPTORS: *Streptomycin, *Ear, *Toxicity,
*Analyzers(Psychology), Nystagmus, Hearing.

Streptomycin may have a toxic effect on the vestibular analyzer: after prolonged injection into dogs we find either a shortening or a complete extinction of the period of postrotational nystagmus, depending upon the total quantity of drug administered. Bilateral impairment of function of the vestibular analyzer is specific for toxic doses of streptomycin under these conditions. The cutting out of the function of the vestibular apparatus (Biological Sciences--Pathology, TT, v. 8, no. 3(over))
